INTRODUCTION

MODERN GOLD COINAGE 1986 provides complete information on all gold money issued in the calendar year 1986. The statistics have been verified by the monetary authorities and are the result of extensive contacts and consultations with ministries of finance, central banks, government and private mints, and numismatic experts throughout the world.

Physical characteristics of coins are given in millimeters, grams, and troy ounces, for which the equivalents are shown below.

1 millimeter	= 0.03937 inch	1 troy ounce	= 1.097 avoirdupois ounces
1 gram	= 0.03215 troy ounce	1 troy ounce	= 31.103 grams
1 troy ounce	= 480 grains	1 million troy ounces	= 31.103 metric tons

The first pages of this report show the top ten issuing countries in 1986, followed by a table of the top ten issuers over the past ten years. These are followed by a summary showing the country, number of issues, the quantity in troy ounces of pure gold used for coinage in each country, and the total amount used worldwide. Pages following the summary are alphabetically arranged by country. Specifications for each coin include its denomination, an abbreviation of the mint which struck the coin (identified at the back of the book), and a brief description of the obverse and reverse of each coin.

Gold Coinages described in this book are money, denominated by the issuing authority in units of local currency or in troy ounces of pure gold content.

Number of Coins Issued refers to the number which became money in the calendar year 1986. If this number is unknown, the authorized limit is shown with an asterisk (*).

Gold Medals and Medallions not issued as money are not included in this compendium.

The preparation of this study has been made possible only by the generous cooperation of mint directors around the world, the governors of central banks, ministers of finance, economists and numismatic experts who have contributed liberally of their time and energy for the realization of Modern Gold Coinage 1986. We gratefully acknowledge their invaluable aid.

HOW TO PURCHASE THESE COINS

The gold coinages issued in 1986 were struck by the mints whose initials are given with each coin. The full names and addresses of the mints which produced them follow the statistical information. In some cases, monetary authorities have indicated that we should refer inquiries and orders to different sales agencies rather than the mint. These exceptions and their sources are listed at the end of this book.

TOP TEN USERS OF PURE GOLD IN COINAGE ISSUES 1986

(Troy Ounces)

Japan	6,430,000
